

DOBI

DOBI WHITEPAPER

Many may ask, what is Dobi? Dobi is the category of dog that you will see with cops. Dobi protect its users from any outer threat so as we do here. We are here to protect solana from invaders. This project responds to the popular demand for dog-based narratives in the crypto space. Dobi was created in response to this demand, and to provide value to the ecosystem.

Dobi is more than just a cryptocurrency, it is also a movement. We believe that Solana has the potential to change the world for the better, and we are committed to making it more inclusive and welcoming for everyone.

THE VISION

Dobi represents more than just a memecoin. As many of you in crypto may already know, memecoins tend to outperform nearly all other assets in the crypto market. Simultaneously, they are often criticized for being perceived as valueless assets. However, this statement is far from the truth, as memecoins serve as a bridge for everyday consumers and institutions to participate in the crypto market in a fun and engaging way, thereby increasing overall demand for various types of cryptocurrencies across different sectors. Dobi's vision extends beyond being a memecoin; it aims to serve as a gateway to attract more consumers, institutions, and alternative

chain enthusiasts into the Solana ecosystem, thereby boosting on-chain activity & growth.

This manifests in various aspects such as, but not limited to: - Enhancing the overall community view of memecoins and fostering on-chain community growth. - Increasing TVL (Total Value Locked) on Solana - Increasing UAW (Unique Active Wallets) through onboarding of new Solana chain users - Increasing the usage of charting tools and decentralized exchanges (DEX) such as Birdeye, Raydium, & Jupiter - Increasing the amount of downloads for Solana based non-custodial wallets, such as Phantom Wallet. - Positively influencing the movement of the \$SOL token's price In the end, attracting more people means raising awareness and education about the ecosystem. With education being the key to achieving mass adoption in the crypto space, Dobi provides immense value to Solana by fostering a fun and safe environment for users to participate and learn

THE UTILITY

- Despite being a memecoin, \$DOBI strikes a perfect balance between fun & usefulness, through the construction of useful products, tools, and services for the Solana ecosystem investor. These utilities provide opportunities for \$DOBI to produce passive revenue streams, this is where DOBINOMICS comes into play. Recognizing a significant gap in the Solana ecosystem, particularly for new projects and to be precise secure projects where one can be sure while investing "DOBINOMICS" was created to address this issue.

DOBI upcoming features , not just a memecoin

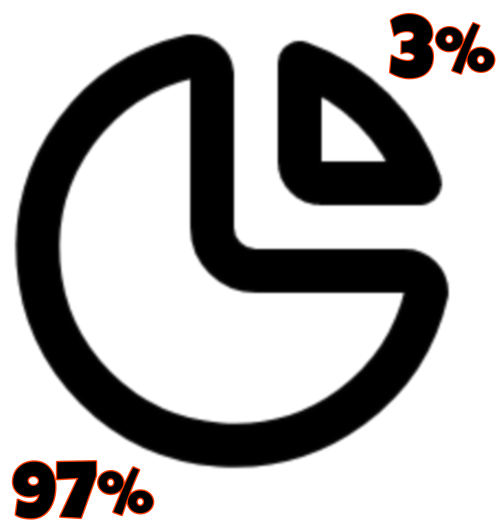

- DOBI NFTS
- DOBI SWAP
- DOBI STAKING
- DOBI SOLANA TOOLS
- DOBI MERCH STORE

Dobi will launch a launchpad on solana where users from different projects on solana can raise initial liquidity for their projects. At initial stage it will be free but as the time passes , there will be a little fees

The revenue generated and collected from these activities will accumulate in the Dobi Treasury, also known as the "Dobi Jar". The treasury address and transaction activity will be publicly disclosed in order to build trust and transparency within the DOBI community. This utility assists buyers in easily checking the prices of their favorite trending coins, identifying new investment opportunities, and garnering overall exposure to well-performing Solana projects. Ultimately these utilities contribute to the concentric improvement and continued growth of the Solana ecosystem as a whole.

DOBI TOKENOMICS

The team DOBI has added 97% of the supply to the raydium and 3% of the supply is with Devs for staking rewards , community campaigns.
